

MATTHEW CLARKE

Manager

MEng – University of Sydney
 BEng (Civil) – University of Queensland
 BBusMgt (Economics) – University of Queensland

Matthew has experience in both consulting and operating roles, including as a Technical Services Manager. He has worked across multiple sites to improve planning and operational performance with experience in leading Life of Mine planning projects and evaluations of mine expansions. Matt has a particular interest and passion for Dragline operations and their optimisation.

Expertise

- **Mine Support and Mentoring:** Adept at developing, managing and mentoring site planning teams to successfully engage with operations and execute mine plans
- **Business Support and Finance:** Developing, writing and presenting business cases for Life of Mine projects, equipment purchases and mine planning scenarios
- **Project Management:** Financial, planning and staff management experience in both civil and mining projects
- **Project Control:** Experienced in operating and maintaining project reporting and management systems to meet the requirements of both internal and external quality control systems
- **Mine Planning:** Extensive Life of Mine planning experience, including Feasibility Studies, financial modelling and scheduling in Spry. Experienced in short, mid and long term Dragline planning.

Career Highlights

Xenith Consulting:

- Matt now leads a multi-disciplinary consulting team responsible for delivering business critical projects for key Xenith clients. Highlights of his two stints with Xenith include:
 - Lead on Mining component of feasibility study into mine expansion
 - Lead on Life of Mine planning studies and due diligence projects
 - Extensive experience in Dragline planning (both consulting and site based)
 - Financial analysis of major contract / own and operate feasibility and execution studies.

Stanwell:

- Development of business cases, executive papers and board papers on mine extensions, equipment selection and operational budgets
- Lead of Pre-feasibility study into mine extension and greenfield mine assessment as well as responsible for mid and long term planning windows
- Oversight of mine contract operations.
