

## BRENT DELANY

### Manager Project Development

BAppSc (Geology) – University of Southern Queensland  
 MBA – Queensland University of Technology  
 Senior Site Executive (SSE)

Brent is a Geologist and SSE with over 25 years’ experience in exploration, geology, geotechnical and operations management for the coal and construction sectors. Brent has been involved in coal exploration project management, for BHP Billiton, CS Energy, Shenhua Watermark Australia, and Stanmore Coal. Brent specialises in the planning of coal exploration programs including managing site access and contractors, ensuring contractual obligations are met by all subcontractors and making technical decisions relevant to the investigation.

### Expertise

- **Exploration:** Evaluation, planning and execution of large and small-scale operations
- **Project Management:** Coordination and development of all relevant statutory obligations, including safety systems and land access requirements. Management of field activities including drilling, earth moving, survey and geophysical contractors making certain these operations are carried out safely, efficiently and on budget
- **Geotechnical:** Supervision of geotechnical investigation contractors and survey teams
- **Operations Management:** Contract management and representing clients on contracts
- **Business Management:** Coordinate business processes from administration through to business development and implementation of business strategies.

### Career Highlights

#### Xenith Consulting

- Successfully completed multiple large and small scale turn key exploration programs in Queensland, Indonesia and Africa
- Acted as Senior Site Executive and Coal Mine Operator for multiple clients, taking on statutory responsibilities and establishing SHMS’s
- Continue to expand services into multiple commodities and grow the service base to add further value to clients through cost effective initiatives.

#### East Coast Exploration (ECE)

- Successfully established exploration methods and applied them to a program founded on procedures not compatible with industry accepted black coal exploration methods. The role was very demanding and satisfying, we created a team of professionals that rose to every obstacle and excelled
- Coordinated business processes from administration through to business development and supported ECE personnel across all clients and implemented business strategies for ECE culminating in taking sole control of the organisation and completing a business merger with Xenith.
