

STEVEN TUCKER

Exploration Superintendent

Diploma - Project Management (BSB51407)

Steve has over 25 year's continuous service in the mining and exploration industry with exposure to base metals, rare earth and coal operations. Steve has extensive experience in project management, leadership and the mentoring of supervisory staff. Steve specialises in the integration of project resources, daily management of operations and project reporting.

Expertise

- **Project Management:** Coordination and development of schedules and plan integration of project functions. Manage contract scope and project finalisation.
- **Human Resources Management:** Recruit and manage personnel, implement performance management strategies, develop relations and resolve conflict, development of staff performance plans and review.
- **Business Management:** Coordinate business processes from administration through to business development and implementation of business strategies.
- **Risk Management:** Facilitate risk assessment and risk management plans and ensure risk management principles are adhered to during the project.
- **Cost Management / Procurement:** Development of project budgets, engage relevant service providers and well as cost, budget and accrual reporting.

Career Highlights

- **East Coast Exploration:** Managed the engagement and training of large workforce to accommodate the rapid growth of the coal sector of BMA. Implemented systems and procedures in fledgling company to BMA compliance standard.
- **Xenith Consulting:** Successfully integrated project resources for mid-tier exploration companies in the Bowen Basin and Surat Basin districts. This included the establishment of working relationships with multiple service providers.
- **Ivanhoe Cloncurry Mines:** Effectively managed the implementation of an approved project plan designed to deliver facilities which would enable production to re-commence. Role required development of progress reports, high level of scheduling, upgrade of site facilities and was delivered on time and within allocated budget of \$3M.
