

TROY TURNER

Managing Director

BAppSc (Geology) – University of Southern Queensland
MAusIMM • MAICD

Troy Turner is a Mining Professional with over 25 years’ experience, and a strong combination of multi-disciplinary technical skills, resource geology expertise and business management acumen. Troy has overall responsibility for the operation of the 3 Xenith offices, as well as project managing some strategic consulting projects for key clients.

Troy has previously led the Xenith geology function for over 10 years specialising in exploration program planning, resource estimation, and due-diligence mining studies as well as being a highly regarded qualified competent person under the JORC code.

Expertise

- **Due-Diligence:** Strong negotiation skills to maintain productive communications and a proactive approach in client follow up at critical project stages.
- **Project Management:** Leading multi-disciplinary teams on both coal resource assessments and mining studies.
- **Operations Management:** Including equipment selection and operational review projects.
- **Exploration:** Evaluation of historical data and exploration program designs in Australia, Indonesia and Africa.
- **Resource Knowledge:** Geological modelling, coal quality and resource estimates for further use in mine planning.
- **Short Term Planning:** Creation of operational plans for immediate implementation.
- **Long Term Planning:** Identification of key value drivers, capability analysis and strategic advice.

Career Highlights

- **Xenith Consulting:** Troy has undertaken project manager roles for studies with value >\$1m for numerous clients, to identify the key value drivers for the project, and to allow key decisions on forward expenditure. He has acted as the owner’s representative in due-diligence and M&A., and for various JV partners in their operations and projects in Australia and overseas. He has mentored the Resource Development group within Xenith in completing numerous public reports in accordance with the JORC code, across multiple commodities. Troy has been at the forefront of establishing the Xenith brand within new markets and other stakeholders in government and industry.
